Application Section I

SUBJECT: CENAP-OP-R 2007-1079-61 VINCENT DAM

Roderick A. Fletcher, P.E.
Director, Bureau of Abandoned Mine Reclamation
P.O. Box 8476
Harrisburg, PA 17105-8476

Dear Mr. Fletcher

This is in regard to the application for a Department of the Army permit to remove the Vincent Dam across the Schuylkill River in East Vincent Township, Chester County, and Limerick Township, Montgomery County, Pennsylvania.

A copy of the public notice of your application is enclosed for your information. You are reminded of your responsibility to obtain State approval from the Pennsylvania Department of Environmental Protection. If you have not done so already, it is requested that you contact the:

Pennsylvania Department of Environmental Protection
Southeast Regional Office
Soils and Waterways Section
2 East Main Street
Norristown, Pennsylvania 19401

When you receive your State Permit(s), it is requested that copies be furnished to this office.

If you should have any questions regarding this matter, please contact Brenda Schrecengost of my office at (215) 656-5866 or by writing to the above address.

Sincerely,

Frank J. Cianfrani
Chief, Regulatory Branch

REGULATORY BRANCH

This District has received an application for a Department of the Army permit pursuant to Section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 403) and Section 404 of the Clean Water Act (33 U.S.C. 1344).

The purpose of this notice is to solicit comments and recommendations from the public concerning issuance of a Department of the Army permit for the work described below.

APPLICANT: Pennsylvania Department of Environmental Protection
Bureau of Abandoned Mine Reclamation

AGENT: Pennsylvania Department of Environmental Protection
Bureau of Waterways Engineering

WATERWAY: Schuylkill River

LOCATION: Vincent Dam is located approximately 80 feet east of the intersection of S.R. 4022 and T-304 (Phoenixville, PA in East Vincent Township, Chester County and Limerick Township, Montgomery County, Pennsylvania
Latitude 40.2056, Longitude -75.5648
The location of the proposed project is shown on the enclosed map (E-1).

ACTIVITY: The project involves the removal of the remains of the partially-breached Vincent Dam across the Schuylkill River between Limerick and East Vincent Townships, on State Game Lands 234. The project will involve the dredging of approximately 1500 cubic yards of material from behind the dam. The project will result in the permanent fill of approximately 0.008 acre of waters of the United States for the purpose of stabilizing the existing abutments, which are to remain, and eroded stream banks in the area immediately surrounding the dam. The existing abutments are to remain in place. Approximately 7,570 square feet of waters will be temporarily filled for the purpose of constructing a causeway and ramp to allow equipment access to the dam. The fill will be removed once the ramp and causeway are no longer required. The current pool size behind the dam is approximately 32 acres; after the removal, there will be no pool post-breach. The removal of the dam will restore approximately 1000 linear feet of stream channel. There is a small wetland area adjacent to the abutment on the western abutment, which will not be disturbed during the removal. A seasonal restriction will require that the work be completed between April and October for the protection of the red-bellied turtle. The dam is proposed to be removed during 2009 in accordance with the seasonal restriction. The proposed work is shown on the enclosed plans E-2 through E-3.

PURPOSE: The purpose of the project is to remove a public safety hazard and to restore the river to a free-flowing condition.

A preliminary review of this application indicates that the proposed work would not affect listed species or their critical habitat pursuant to Section 7 of the Endangered Species Act as amended. As the evaluation of this application continues, additional information may become available which could modify this preliminary determination.

The decision whether to issue a permit will be based on an evaluation of the activity's probable impact including its cumulative impacts on the public interest. The decision will reflect the national concern for both protection and utilization of important resources. The benefits which reasonably may be expected to accrue from the work must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the work will be considered including the cumulative effects thereof; among those are conservation, economics, aesthetics, general environmental concerns, wetlands, cultural values, fish and wildlife values, flood hazards, flood plain values, land use, navigation, shore erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs and welfare of the people. A Department of the Army permit will be granted unless the District Engineer determines that it would be contrary to the public interest.

The Corps of Engineers is soliciting comments from the public; Federal, State, and local agencies and officials; Indian Tribes; and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

Comments on the proposed work should be submitted, in writing, within 15 days to the District Engineer, U.S. Army Corps of Engineers, Philadelphia District, Wanamaker Building, 100 Penn Square East, Philadelphia, Pennsylvania 19107-3390.

The Pennsylvania Historic & Museum Commission, Bureau for Historic Preservation, has indicated that the Vincent Dam contributes to the significance of the National Register eligible Schuylkill River Canal Navigation System (Schuylkill Canal). The removal of this historic dam will adversely affect the Schuylkill Canal. However, the Memorandum of Agreement (MOA) for the removal of the Felix Dam included the entire Schuylkill Canal in order to study the history and all associated resources, including Vincent Dam. Therefore, mitigation for the removal of Vincent Dam will consist only of photographic documentation. The next step will be the development of the MOA for Vincent Dam. Any party interested in participating in the development of the MOA for Vincent Dam should contact the Corps of Engineers prior to the expiration of this public noticed.

The Magnuson-Stevens Fishery Conservation and Management Act, as amended by the Sustainable Fisheries Act 1996 (Public Law 104-267), requires all Federal agencies to consult with the National Marine Fisheries Service on all actions, or proposed actions, permitted, funded, or undertaken by the agency that may adversely effect Essential Fish Habitat (EFH). A preliminary assessment of the species listed in the "Guide to Essential Fish Habitat Designations in the Northeastern United States, Volume IV: New Jersey and Delaware", dated March 1999, indicates that there is no Essential Fish Habitat located in the Schuylkill River.

In accordance with Section 307(c) of the Coastal Zone Management Act of 1972, applicants for Federal Licenses or Permits to conduct an activity affecting land or water uses in a State's coastal zone must provide certification that the activity complies with the State's Coastal Zone Management Program. The applicant has stated that the proposed activity complies with and will be conducted in a manner that is consistent with the approved State Coastal Zone Management (CZM) Program. No permit will be issued until the State has concurred with the applicant's certification or has waived its right to do so. Comments concerning the impact of the proposed and/or existing activity on the State's coastal zone should be sent to this office, with a copy to the State's Office of Coastal Zone Management.

In accordance with Section 401 of the Clean Water Act, a Water Quality Certificate is necessary from the State government in which the work is located. Any comments concerning the work described above which relate to Water Quality considerations should be sent to this office with a copy to the State.

The evaluation of the impact of the work described above on the public interest will include application of the guidelines promulgated by the Administrator, U.S. Environmental Protection Agency, under authority of Section 404(b) of the Clean Water Act.

Any person may request, in writing, to the District Engineer, within the comment period specified in this notice, that a public hearing be held to consider this application. Requests for a public hearing shall state in writing, with particularity, the reasons for holding a public hearing.

Additional information concerning this permit application may be obtained by calling Brenda Schrecengost at 215-656-5866 between the hours of 1:00 and 3:30 p.m. or writing this office at the above address.

Frank J. Cianfrani
